

## BAKER STREET BEHAVIORAL HEALTH:

*Providing Psychology, Psychiatry, Medication Management - including Genetic Testing, and Neuropsych services. Now accepting patients with no waitlist for children, adolescents, adults and families.*

**As a multi-discipline, and multi-location mental health practice, we pride ourselves as a valued and trusted referral partner for medical, legal, athletic, and educational entities throughout the United States.**

Along with our offices in NJ, we provide telehealth and virtual sessions to patients across the USA.

## SPECIALTIES INCLUDE

### ***Clinical Psychology***

Baker Street clinicians systematically approach behavioral health issues with the goal of restoring minds, bodies, and spirits. Using evidence-based therapeutic modalities, we treat each individual, couple, and family member with proven strategies and techniques to facilitate healing.

### ***Psychiatry & Medication Management Services***

We know that taking medication is a very personal choice. Baker Street Behavioral Health provides skilled practitioners with expertise in maximizing the benefits of medication and minimizing the possibility of side effects. We offer genetic testing to guide medication recommendations. Our prescribers can work collaboratively with you to help you choose in what situations you might want to use medication and if and when you might want to go off medication.

### ***Neuropsychological Evaluation***

Receiving an accurate diagnosis improves outcomes in school, at work, and in social environments. The results of a neuropsychological evaluation can ensure children get access to the educational assistance, therapy, medication and behavioral management strategies they need to be successful in their lives. Neuropsychological evaluations can be provided to diagnose: ADHD, Autism, & Learning Disabilities.
