Creative Perspectives

In-Home and Community Based Services

About Us:

Established in 2016, Creative Perspectives is a therapist owned and operated community based organization. Creative Perspectives is comprised of a diverse group of experienced therapists, behavioral assistants, and mentors. Our staff at Creative Perspectives embraces the wraparound approach. We are confident that our staff members are skilled to play an impactful role on a child and family team.

Our Mission:

Creative Perspectives strives to provide therapeutic services to children and families within their communities. Our experienced staff members are dedicated to providing individualized treatment catered to the various needs of the children and families that we serve. We strive to engage and support families to attain their individual treatment goals. To do so, we use a host of creative behavioral and therapeutic interventions to assist children and families towards achieving stability within their homes and communities.

"Alone we can do little; together we can do so much."

- Helen Keller

Intensive In-Community (IIC) Services:

IIC services are multi-purpose clinical interventions/support for families and children with behavioral and emotional challenges who are also receiving case management or mobile response and stabilization services. IIC services consist of incisive and goal oriented needs-based clinical interventions to provide stability for the youth and family within the home and community setting. IIC services are flexible as to location and time. Depending on the needs of the family, IIC services may either be provided within the youth's home or within the youth's community. IIC services are provided by a licensed masters' level clinician and is intended to stabilize and support the youth and family in an effort to deter more intensive interventions.

Behavioral Assistant (BA) Services:

At Creative Perspectives, Behavioral Assistants (BAs) work as part of the children and family team under the direct supervision of a Licensed Clinical Social Worker (LCSW). BA services consist of specific, outcome-oriented interventions that are delivered as part of a comprehensive treatment plan prepared by a licensed clinical behavioral healthcare practitioner. BAs provide face-to-face interventions that focus on addressing specific target behaviors and improving overall emotional and behavioral regulation abilities for children who are receiving care management or mobile response and stabilization services. BA services are flexible as to location and time.
